TEST YOUR CORN

MISSOURI FARMERS URGED TO DO SO BEFORE PLANTING

MONEY IN GOOD SEED

State Board of Agriculture Condemns Guesswork in Choosing—Cannot Afford to be Careless

If Missouri, this year, is to have a prosperous year, the farmers of this great state can do nothing to more effectively assure that result than to exercise care in selecting seed corn. This is the view of the state board of agriculture as expressed in a special bulletin issued today and sent to every county. Guesswork in choosing seed corn is condemned in the most vigorous fashion, and farmers are advised to test every bushel.

"See what per centage of the kernels on each ear will germinate and show strong, healthy plants," says the circular. "Some stalks outgrow othrs under the same conditions. The difference is vitality. If you have good home grown seed corn, you are lucky. If not, you should get busy right now and buy. In buying, keep the following rules in mind:

"Get well bred seed that has been stored in the right way.

"Give preference to medium smooth ears, and buy in the ear.

"Never buy corn grown on strong bottom land to use as seed on upland.

"If you must buy away from home, do not go too far north or too far south

"Don't put too much faith in the corn you buy—it needs testing, too.

"The Missouri farmer is rich, but not so rich that he can afford to pass up a chance to make $8,000,000 or $10,000,000. With a little work right now, he can make this much money. How? By testing his seed corn—testing it in a box or by other methods, before planting the crop, instead of in the field after planting. The board of agriculture advises action on the seed corn question, without waiting till planting day.

"Is the possible saving an exaggeration? Let's see. For an average year the Missouri farmer plants 7,600,000 acres of corn.

"The cost of growing and harvesting an acre of corn (including rent of land or interest on investment) is about $12.

"Figuring an average stand at 80 per cent (it will seldom be higher), the Missouri farmer is cultivating, at a cost of $18,240,000, about 1,520,000 acres of 'corn land' on which no corn is grown.

"Perfect seed corn will result in a perfect stand—unfavorable weather conditions, moles, mice and other draw backs must be considered—but first class seed corn ought to reduce by half the loss in stand. This would mean a saving of 10 per cent-$9,120,000 in labor and investment, one-half of that now lost.

"Or, figure it another way actually growing more corn, rather than cultivating fewer acres. A 10 per cent increase in stand would be equivalent to 760,000 additional acres. Figure the yield at 30 bushels, which we ought to beat in Missouri this year, and we have 22,800,000 bushels worth at 50 cents per bushel, $11,400,000."

Some Land Deals.

Charles Wilson sold his 200-acre farm Wednesday afternoon, which is located three and one-half miles north west of Parnell, to J. D. Jones for $17,000. At the same time, J. D. TIE LETTERS TO PARCELS NOW.

Postmaster General Burleson Adds to Convenience of Package Service.

To further add to the popularity of the parcel post, Postmaster General Burleson signed an order today which will permit the attaching of a letter to a package when both bear their respective rates of postage and are addressed to the same individual. The sending of a communication with a parcel post package heretofore has not been permissable.

Postal officials pointed out today that it is often of the utmost importance that the sender of an article of merchandise write a letter concerning it and that, in order to avoid delay and facilitate the transaction of business, it is highly desirable that the parcels and communications be delivered at the same time. It was with this in mind that today's order was issued. The letter or communication, however, is not to be inclosed in the package, but it is to be securely fastened to the outside in such manner as to prevent its separation from the package. The new order is expected to enlarge considerably the parcel post service.

THICK, GLOSSY HAIR FREE FROM DANDRUFF

Girls! Try It! Hair Gets Soft, Fluffy and Luxuriant at Once—No More Falling Hair.

If you care for heavy hair, that glistens with beauty and is radiant with life; has an incomparable softness and is fluffy and lustrous, try Danderine.

Just one application doubles the beauty of your hair, beside it immediately dissolves every particle of dandruff; you cannot have nice, heavy, healthy hair if you have dandruff. This destructive scurf robs the hair of its lustre, its strength and its very life, and if not overcome it produces a feverishness and itching of the scalp; the hair roots famish, loosen and die; then the hair falls out fast.

If your hair has been neglected and is thin, faded, dry, scraggy or too oily, get a 25-cent bottle of Knowlton's Danderine at any drug store or toilet counter; apply a little as directed and ten minutes after you will say this was the best investment you ever made.

We sincerely believe, regardless of everything else advertised, that if you desire soft, lustrous, beautiful hair and lots of it—no dandruff—no itching scalp and no more falling hair —you must use Knowlton's Danderine. If eventually—why not now?—Advertisement.

Facts About Western Canada

The farmer of today is recognized as a business man and puts himself on the pay roll at a salary beyond the dreams of the average man in the city, and he pays dividends on his investment.

Nowhere is he in a better position to realize the full profit of this condition than in Western Canada, with the rich productive soil at small cost and splendid markets; realizing from 40 to 100 per cent on his investment and obtaining the independence that cannot belong to any other business man.

The 433,000,000 bushel grain crop of Saskatchewan and Alberta yielded $235,000,000 to the farmers last year. This represents the partial yield of less than 15 per cent of the available land under cultivation. Millions upon millions of acres of the finest arable land in the world awaits the plough—YOUR PLOUGH.

The annual increase in the world's population establishes an ever-growing market, and nowhere can you find more ideal conditions for grain raising than Western Canada affords. Grain growing, however, is but one item in the success of the Canadian farmer.

Our first excursion to this country of opportunity will be April 7th. For rates and terms see

TEST YOUR CORN

MISSOURI FARMERS URGED TO DO SO BEFORE PLANTING

MONEY IN GOOD SEED

State Board of Agriculture Condemns Guesswork in Choosing—Cannot Afford to be Careless

If Missouri, this year, is to have a prosperous year, the farmers of this great state can do nothing to more effectively assure that result than to exercise care in selecting seed corn. This is the view of the state board of agriculture as expressed in a special bulletin issued today and sent to every county. Guesswork in choosing seed corn is condemned in the most vigorous fashion, and farmers are advised to test every bushel.

"See what per centage of the kernels on each ear will germinate and show strong, healthy plants," says the circular. "Some stalks outgrow othrs under the same conditions. The difference is vitality. If you have good home grown seed corn, you are lucky. If not, you should get busy right now and buy. In buying, keep the following rules in mind:

"Get well bred seed that has been stored in the right way.

"Give preference to medium smooth ears, and buy in the ear.

"Never buy corn grown on strong bottom land to use as seed on upland.

"If you must buy away from home, do not go too far north or too far south

"Don't put too much faith in the corn you buy—it needs testing, too.

"The Missouri farmer is rich, but not so rich that he can afford to pass up a chance to make $8,000,000 or $10,000,000. With a little work right now, he can make this much money. How? By testing his seed corn—testing it in a box or by other methods, before planting the crop, instead of in the field after planting. The board of agriculture advises action on the seed corn question, without waiting till planting day.

"Is the possible saving an exaggeration? Let's see. For an average year the Missouri farmer plants 7,600,000 acres of corn.

"The cost of growing and harvesting an acre of corn (including rent of land or interest on investment) is about $12.

"Figuring an average stand at 80 per cent (it will seldom be higher), the Missouri farmer is cultivating, at a cost of $18,240,000, about 1,520,000 acres of 'corn land' on which no corn is grown.

"Perfect seed corn will result in a perfect stand—unfavorable weather conditions, moles, mice and other draw backs must be considered—but first class seed corn ought to reduce by half the loss in stand. This would mean a saving of 10 per cent-$9,120,000 in labor and investment, one-half of that now lost.

"Or, figure it another way actually growing more corn, rather than cultivating fewer acres. A 10 per cent increase in stand would be equivalent to 760,000 additional acres. Figure the yield at 30 bushels, which we ought to beat in Missouri this year, and we have 22,800,000 bushels worth at 50 cents per bushel, $11,400,000."

Some Land Deals.

Charles Wilson sold his 200-acre farm Wednesday afternoon, which is located three and one-half miles north west of Parnell, to J. D. Jones for $17,000. At the same time, J. D. Jones sold his 80-acre farm, located four miles southeast of Maryville to Chas. Wilson, consideration was $8,000. Both deals were made by Allen Brothers. Each party gets possession of their respective purchases March 1, 1915.

TIE LETTERS TO PARCELS NOW.

Postmaster General Burleson Adds to Convenience of Package Service.

To further add to the popularity of the parcel post, Postmaster General Burleson signed an order today which will permit the attaching of a letter to a package when both bear their respective rates of postage and are addressed to the same individual. The sending of a communication with a parcel post package heretofore has not been permissable.

Postal officials pointed out today that it is often of the utmost importance that the sender of an article of merchandise write a letter concerning it and that, in order to avoid delay and facilitate the transaction of business, it is highly desirable that the parcels and communications be delivered at the same time. It was with this in mind that today's order was issued. The letter or communication, however, is not to be inclosed in the package, but it is to be securely fastened to the outside in such manner as to prevent its separation from the package. The new order is expected to enlarge considerably the parcel post service.

THICK, GLOSSY HAIR FREE FROM DANDRUFF

Girls! Try It! Hair Gets Soft, Fluffy and Luxuriant at Once—No More Falling Hair.

If you care for heavy hair, that glistens with beauty and is radiant with life; has an incomparable softness and is fluffy and lustrous, try Danderine.

Just one application doubles the beauty of your hair, beside it immediately dissolves every particle of dandruff; you cannot have nice, heavy, healthy hair if you have dandruff. This destructive scurf robs the hair of its lustre, its strength and its very life, and if not overcome it produces a feverishness and itching of the scalp; the hair roots famish, loosen and die; then the hair falls out fast.

If your hair has been neglected and is thin, faded, dry, scraggy or too oily, get a 25-cent bottle of Knowlton's Danderine at any drug store or toilet counter; apply a little as directed and ten minutes after you will say this was the best investment you ever made.

We sincerely believe, regardless of everything else advertised, that if you desire soft, lustrous, beautiful hair and lots of it—no dandruff—no itching scalp and no more falling hair —you must use Knowlton's Danderine. If eventually—why not now?—Advertisement.

Facts About Western Canada

The farmer of today is recognized as a business man and puts himself on the pay roll at a salary beyond the dreams of the average man in the city, and he pays dividends on his investment.

Nowhere is he in a better position to realize the full profit of this condition than in Western Canada, with the rich productive soil at small cost and splendid markets; realizing from 40 to 100 per cent on his investment and obtaining the independence that cannot belong to any other business man.

The 433,000,000 bushel grain crop of Saskatchewan and Alberta yielded $235,000,000 to the farmers last year. This represents the partial yield of less than 15 per cent of the available land under cultivation. Millions upon millions of acres of the finest arable land in the world awaits the plough—YOUR PLOUGH.

The annual increase in the world's population establishes an ever-growing market, and nowhere can you find more ideal conditions for grain raising than Western Canada affords. Grain growing, however, is but one item in the success of the Canadian farmer.

Our first excursion to this country of opportunity will be April 7th. For rates and terms see

TAKES OFF DANDRUFF
HAIR STOPS FALLING

Girls! Try This! Makes Hair Thick, Glossy, Fluffy, Beautiful—No More Itching Scalp.

Within ten minutes after an application of Danderine you cannot find a single trace of dandruff or falling hair and your scalp will not itch, but what will please you most will be after a few weeks' use, when you see new hair, fine and downy at first—yes—but really new hair—growing all over the scalp.

A little Danderine immediately doubles the beauty of your hair. No difference how dull, faded, brittle and scraggy, just moisten a cloth with Danderine and carefully draw it through your hair, taking one small strand at a time. The effect is amazing—your hair will be light, fluffy and wavy, and have an appearance of abundance; an incomparable lustre, softness and luxuriance.

Get a 25-cent bottle of Knowlton's Danderine from any drug store or toilet counter, and prove that your hair is as pretty and soft as any—that it has been neglected or injured by careless treatment—that's all—you surely can have beautiful hair and lots of it if you will just try a little Danderine.—Advertisement.
